HIC, GOAL—100 YEARS FOR STALIN—Russian woman biologist Olga Lepeshinskaya, who claims to have discovered secrets for prolonging life span to 100 years, is pictured in her Moscow laboratory. There, at the moment, she is reportedly directing her efforts to keeping Premier Stalin, 72, alive for another 25 years. The professor said her new-born are said to have moved into the Kremlin to conduct on-the-spot experiments.—Central Press Canadian.

NOOTRA INTERRUPTS BUSINESS OF WAR FOR SOCIAL CALL—Able Seaman Earl McWhinney of Windsor, Ont. (left), and Able Seaman R. R. Tindal of Lakeview, Ont. follow crew members of the destroyer H.M.C.S. Nootka, are shown with two Korean children and a South Korean marine during a recent call-off the east coast of Korea. They went ashore to the friendly island during a daylight anchorage.—Central Press Canadian.

ENGINE REPLACES COOLIES FOR RICKSHAS—The modern ricksha depends on gasoline instead of coolies for motor power. This one is being tested on a Berlin street before shipment to China where thousands have been ordered.—Central Press Canadian.

NINE-YEAR-OLD MEETS FAMED PEN PAL—Slightly awed, at first, by Prime Minister St. Laurent's friendly greeting, nine-year-old Grant Robinson, of Severn Bridge, Ont., soon was put at ease by the kindly prime minister, a grandfather himself. The youngster, whose birthday is on February 1, the same day as Mr. St. Laurent's, was thrilled to meet the prime minister with whom he has been corresponding for some time. Meeting was typical of the informal, non-political aspect of the prime minister's tour of the Georgian Bay area. He will later visit western provinces.—Central Press Canadian.

WATERFRONT NEWCOMER—Framed by two Dutch girls in their native costume, the new Holland-America Line ship Maatsoom slips beneath Jacques Cartier Bridge at Montreal marking her maiden voyage to Canada a courtesy visit from the people of The Netherlands.

TRADE BALANCE HITS PEACE-TIME HIGH—In the first six months of 1952, movement of goods in and into Canada has been the greatest since the war. And the favorable trade balance for Canada stands at \$105,000,000. Last year, during the same period, there was an unfavorable balance of \$329,000,000. Volume of Made-in-Canada exports, shipped by cargo vessel, railway and air, increased by 22 per cent.

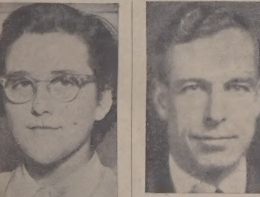

ARMY, NAVY, AIR FORCE IN JOINT DISPLAY—From Baginville, Que., a squadron of R.C.A.F. jet planes has flown to Toronto to demonstrate high-speed formation flying at the Canadian National Exhibition. The squadron is joining naval aircraft from Dartmouth, N.S., and army artillery and tanks to put on a display of all branches of the Canadian armed services.—Central Press Canadian.

WHILE ELDERS ARGUE, U.N. CHILDREN ENJOY THEMSELVES—Setting an example for their elders in the United Nations debates, children of the U.N. delegates from all over the world frolic and study together in perfect harmony. Language proves only a minor barrier as the youngsters find their taste for play, ice cream and candy is universal. Here three U.N. children are shown on Rockaway Beach, N.Y. Mary Ann from France; Michael from the U.S. and Marylyn from Holland.—Central Press Canadian.

Imports and exports from Latin America are showing a gradual increase, according to the dominant bureau of statistics in its report on Canada's trade position in 1952. While Canada is developing industry to turn out manufactured goods, Latin America relies on such indigenous products as coffee to maintain its trade position. Here coffee plantation workers strain beans and dust from the beans by tossing them on a sieve.—Central Press Canadian, Florida.

GIRL FELS ARMED THUG WITH POP BOTTLE—Jane Goley, 16, wasted no time when she saw her uncle, Robert Goley, felled by a thug with a pop bottle in a Highland Circle, Ont., service station. First, she hit the thug with a fishing pole, and when that didn't have the desired effect, she knocked him unconscious with a pop bottle.

NAMED CHIEF OF CONCILIATION BOARD—Mr. Justice R. L. Lauder, of the Supreme Court of Canada, will head the three-man commission dealing with a dispute between the railways and 125,000 employees. The board has the task of bringing together the railways and the employees, and settling a number of issues that include wages, hours and working conditions. The railway is costing around \$150,000,000 a year.—Central Press Canadian.

EXTRA JETS GIVE EXTRA BOOST TO CANADA'S CF-100—Canada's long range all-weather interceptor jet fighter, the CF-100 Canuck, is shown during a jet assisted takeoff at the R.C.A.F. Uplands station near Ottawa, where it is being tested by the R.C.A.F. Designed to enable heavy aircraft to take off on small landing strips, the six JATO bottles under the Canuck's fuselage give its two Granda jet engines an added thrust of 1,600 pounds each. In the test, the CF-100 took off with a full load of fuel and armament plus two one-ton and pound bombs in less than half the normal takeoff run.—Central Press Canadian.

THROUGH FIRE TO RESCUE COMRADE—Under heavy fire from Communist guns, three U.S. soldiers cautiously work their way through heavy foliage in their drive "Warrior Hill" in Korea area, to rescue a wounded comrade. On 300 yards of front there, U.S. artillery had down a battery of 20-mm shells, with the Communists trying to match shell for shell.—Central Press Canadian.

A Bruise: What It Is and How to Treat It

Hashed out in history as being the most common injury, bruises are less in the same classification as blisters from the viewpoint of being paid too little attention by the average athlete.

Though the average bruise is nothing to really worry about, it is given proper attention, a really bad bruise can cause a lot of trouble in the future if it isn't taken properly care of. The same thing applies when the same part of the body is repeatedly bruised. Without treatment, it can become calcified and is a great spot for a long time.

When you get a bruise it means that the muscle fibres have been torn. There is quite a shock to the muscles, and the muscle fibres, blood vessels and connective tissues in the area are lacerated.

When the contact is made the blood vessels are broken and there is some internal bleeding in the muscle. Muscle fibres come through the walls of the broken tissue and the area of the injury is gummed up by a sticky mass of all the broken tissue and fluids. The effect of this is to form three proteins pain. The inflammation which is exhibited by pain, redness, swelling, heat over the area and difficulty of movement.

The tenderness is caused by the blood vessels being broken and the blood flowing into the muscle tissue. As far as preventing a bruise is concerned, the only thing to do is to avoid contact with hard objects.

World Happenings Briefly Told

The city is growing so rapidly in Vancouver that the city council is studying by-law to control expansion. There are now 2,000 more people there.

The Queen has told one of her racehorses, "Thunderbolt," to be a champion. It was bought at the annual bloodstock sale by Scottish trainer P. T. Dodd.

A legend movie company has been given permission to make a 15-minute documentary film of the life of the late, to be released in 1958 before the coronation, next June.

Reforestation laws have resulted in a decline in Sweden. Forests have been cut down so fast that the country now has only 40,000,000 cubic feet of wood as compared to 50,000,000 in 1928.

British fire brigades are to adopt a system of helmet markings to show the rank of officers. Fire officers will have white helmets marked by black bands, while firemen will have white helmets with black bands.

The Queen of the Sea smokes too. The New York City's board of health has notified officials of United States Lines that their new superliner, "United States," is violating the city's anti-smoke ordinance by smoking on the ship.

A report from Ontario says that work at a result of strikes and lockouts amounted to 3,000 man-hours during the first seven months of this year, compared with 347,500 in the corresponding period of 1953.

British scientists have developed a new underwater television camera, making tests on the Scottish marine biological association's research in the North Sea. Screens will enable close-up study of habits and mass movements of fish—the millions that got away.

On The Side: E. V. Durand

In Sweden, every vacation home has a dog on trips leaving their husbands at home. During their absence the husbands handle all home business and care of the children. No Swedish woman is considered really married unless she has a dog on her side.

Swedish women are very strict about their husbands. They are very strict about their husbands. They are very strict about their husbands. They are very strict about their husbands.

to write good hitting, properly designed equipment and, of course, to develop some skill as possible. However, it is practically impossible to avoid some bruising regardless of what protective measures you take.

(Next week, the second and final section of this series will be published.)

Bunting Important in Playoffs

It is important to know that you can place the bunting in the playoffs. It is a great play, a player who can win a lot of games for his team—especially when the playoffs come around and the games are close and hard fought.

Place two markers on the first and third base lines, on 14 feet from home plate and the other 18 feet. Have a pal pitch slow ones about knee height and alternate try to beat them down the first and third base lines, trying to beat the ball so that it stops between the two markers, which is the ideal spot.

Get "Drive" Into Your Play

It is human nature to take things too much. It is human nature to take things too much. It is human nature to take things too much. It is human nature to take things too much.

When playing, taking, skating, shooting or doing whatever play you are making, keep that word "drive" in your mind, say it word "drive" many times. Associate it with "drive" many times. Associate it with "drive" many times.

ROBIN ROBINSON, Philby right-hander, shows Willie Jones, (left), the number of victories he has after he defeated the Pittsburgh Pirates to become the first winner in the National League to win 20 games. Jones hit a sixth-inning, three-run homer to put the game on ice.

B.C. Paper Big Winner In Competitions

ST. ANDREW'S N.B. — British Columbia and Ontario papers named one of the Canadian Weekly News papers, the B.C. Paper, as the winner in the C.W.N.A. awards announced last week.

The Powell River, B.C. News had the winners by taking all three first places in competitions for papers with a circulation between 2,000 and 3,000.

The winners: Circulation over 3,000—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 2,000 and 3,000—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 1,000 and 2,000—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 500 and 1,000—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 200 and 500—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 100 and 200—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 50 and 100—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 20 and 50—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 10 and 20—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 5 and 10—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 2 and 5—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 1 and 2—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 0 and 1—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 0 and 0—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

Circulation between 0 and 0—Best all-around paper, *St. Andrew's N.B.*; Best front page, *St. Andrew's N.B.*; Best editorial page, *St. Andrew's N.B.*

REGINA—Saskatchewan farmers have won fewer cattle and horses than they did in the entire years of 1956, 1958 and 1959. R. Brockelbank, director of the Saskatchewan animal industry branch, said in a bureau of publications release.

Since 1956, though the number of horses and cattle has been reduced, the acreage of seeded and other pastures has increased.

In 1958 there were 2,500,000 head of horses and cattle on 15,000,000 acres of seeded pasture and 15,000,000 acres of other pasture.

In 1959 there were 2,000,000 head of horses and cattle on 12,000,000 acres of seeded pasture and 12,000,000 acres of other pasture.

Last year, there were 1,500,000 head of horses and cattle on 10,000,000 acres of seeded pasture and 10,000,000 acres of other pasture.

Throughout this period the ratio between acreage and head of livestock has been about 15 to 1.

The ratio between acreage and head of livestock has been about 15 to 1. The ratio between acreage and head of livestock has been about 15 to 1.

Soil Expert Predicts Famine In South Africa—Erosion Blamed

Candemans Africans for Devouring Their Heritage of Land — Forest and Water

JOHANNESBURG—With the rainy season approaching South Africa is beginning to cast an ominous eye at the weather. A drought might mean famine, even with good rains, food is going to be pretty scarce, according to some forecasts. Such claims are described by the agriculture department as grossly exaggerated, but they are taken seriously by many others.

C. J. van Rensburg, a government official, said that the drought might mean famine, even with good rains, food is going to be pretty scarce, according to some forecasts. Such claims are described by the agriculture department as grossly exaggerated, but they are taken seriously by many others.

Decline in Number of Sheep On Canadian Farms Attributed To Number of Reasons

But Indications Are the Reduction May Be Coming To A Halt and Prospects For Better Prices Are Reasonably Good

In 1951 the number of sheep and lambs on farms in Canada was the lowest since before Confederation. The decline has been irregular with an upward trend from 1925 to 1933 followed by a sharp decline only now interrupted only in the years 1942-44. In Eastern Canada the decline has been fairly regular since 1900, while in Western Canada numbers continued to increase until 1944 but fell off rapidly after that date.

Writing in the *Economist*, Atlantic, a publication of the Economist Division, Department of Agriculture, Ottawa, J. M. Mann says the decline in numbers may be attributed to a number of reasons, but it is difficult to determine their relative importance. The competition of other meat animals, the difficulty of obtaining live stock at the best prices, the increasing cost of adequate fencing, and the still prevalent menace of dogs and predatory animals are all indicated as reasons.

In the ten years between 1932 and 1941 the price of slaughter cattle averaged 6.0 per cent of the price of sheep and lambs, and in the ten years that followed the proportion rose to 8.1 per cent. The increase in cattle prices has been one of the important factors in the reduction of sheep population in the Prairie since 1940. One writer has noted that "with the increase in the price of cattle and the decline in the price of sheep, the sheep raiser is being squeezed out of the business."

Labour appears to have been a more important factor than has been in the case, for there was a decrease of four million, or 4.2 per cent, in the total acreage in farms in Eastern Canada between 1941 and 1951, suggesting that the decline of the sheep population may be due, at least in part, to the loss of land.

The decline in the sheep population of Canada during the last three years has become so marked indicating a halt in the reduction of the population. This latter period coincides with one of declining per capita consumption of meat products which suggests that a profitable export market may be opening up as a result of a reduction of breeding stock and a shift of sheep from the domestic to the export market.

The decline in the sheep population of Canada during the last three years has become so marked indicating a halt in the reduction of the population. This latter period coincides with one of declining per capita consumption of meat products which suggests that a profitable export market may be opening up as a result of a reduction of breeding stock and a shift of sheep from the domestic to the export market.

Due to circumstances beyond his control the farmer is frequently unable to plant, in the spring of the year, the crops which he needs for his own consumption. This is the dilemma of every planter who is unable to plant, in the spring of the year, the crops which he needs for his own consumption. This is the dilemma of every planter who is unable to plant, in the spring of the year, the crops which he needs for his own consumption.

Transplanting Of Evergreen Seedlings In Fall

Due to circumstances beyond his control the farmer is frequently unable to plant, in the spring of the year, the crops which he needs for his own consumption. This is the dilemma of every planter who is unable to plant, in the spring of the year, the crops which he needs for his own consumption.

An adequate soil moisture supply is essential for the successful establishment of evergreen seedlings in the autumn. This is the dilemma of every planter who is unable to plant, in the spring of the year, the crops which he needs for his own consumption.

Quick Canadian Quiz

- Which cover the greater area, our agricultural land or our forest land?
- What explorer was the first white man to reach Canada? Pacific coast by him?
- In what year did the first Canadian ship arrive in Latin America?
- In what year did Manitoba, British Columbia and Prince Edward Island enter Confederation?
- In Canada an importer or exporter of goods?

Fall Coats, Dresses Stress Casual Wear

Model wearing a fall coat, designed by J. M. Mann.

The decline in the sheep population of Canada during the last three years has become so marked indicating a halt in the reduction of the population. This latter period coincides with one of declining per capita consumption of meat products which suggests that a profitable export market may be opening up as a result of a reduction of breeding stock and a shift of sheep from the domestic to the export market.

An informal, casual outfit is more in fashion for this fall. Multi-colored, knee length coat, with a wide collar, and a belt, is a good example of the new style.

London Busmen Enjoyed Trip To Canada And U.S.

LONDON—Nine cockney busmen came aboard five months ago as an official "Canada-to-Britain" tour to attract a reputation for busmen by clearing that "temperature, just before departure, is what makes American women, especially those in California, more attractive than those over here."

Too Real Shock To Deter Men In Old Days

CHICAGO—Electricity 100 years ago didn't give light and power, but sometimes played a part in the life of the man. A science tale book of 1897 tells of an electric machine that generated static electricity and was popular at parties.

Brakeless Bus Well Handled By Driver

CHICAGO—A bus with no brakes was driven by a driver who had no brakes. The bus was driven by a driver who had no brakes. The bus was driven by a driver who had no brakes.

Smile Of The Week

Mr. Forsythe was visiting downtown of St. Louis. He was in the club house. "What's the matter?" he asked. "I've killed my wife," said the member. "Good heaven! Who did you do that?" "I was over in the practice box and didn't see her coming up behind me. I took a back swing and hit her on the head. She dropped dead."

Greater London has a population of about 10 million.

New Industrial Era Looms For Edmonton During 1953

(By Jim Pascoe, Canadian Press Staff Writer)

A new industrial era, based on Alberta's natural gas, will begin in Edmonton early in 1953 unless steel shortages and strikes cause further construction delays. Completion of the Canadian Chemical Company's \$35,000,000 plant on Edmonton's eastern outskirts will mark the opening of Western Canada's first large-scale chemical industry.

Utilizing the natural resources of Alberta—namely 40,000 cubic feet of natural gas daily—the new industry will provide basic chemicals and textile materials which Canadian companies will turn into thousands of products for home use and export.

Natural gas is readily available from Edmonton and the city expects to reap great benefits from its development in Alberta.

Canadian Chemical, a subsidiary of the Canadian Chemical Company, is located in the Edmonton area, and when in operation the plant will consume 27,000,000 cubic feet of natural gas daily.

The plant, costing \$35,000,000, is to use 10,000,000 cubic feet of natural gas daily to produce polyethylene and to use 10,000,000 cubic feet of natural gas daily to produce polyethylene and to use 10,000,000 cubic feet of natural gas daily to produce polyethylene.

BUSY BEES

How many bee-hives of labor go into the production of new pound of meat?

The experts have been trying to find the answer to the question for almost half a century and still are not sure. One father and son team, after 40 years of observing bees under varying conditions, could save working field bee with an average of 200 bees gathering honey at the rate of 20 flowers per minute and 200 bees per flower.

Another authority, expert G.L. Agricultural News, says that a single bee can visit 10 to 20 flowers per minute and make 10 to 20 trips per minute. It was possible for a single bee to visit 10 to 20 flowers per minute and make 10 to 20 trips per minute.

Bees have been observed gathering honey at the rate of 20 flowers per minute and 200 bees per flower. The experts have been trying to find the answer to the question for almost half a century and still are not sure.

Young Mother Killed In Freck Car Accident

PORTLAND, Idaho.—A young mother was killed in a car accident. The car was driven by a young mother who was killed in a car accident.

The body of Mrs. James Schultz, 24, was found about three hours after the accident. Her husband was injured and taken to the hospital. The car was a 1952 Ford.

Schultz was picked up by a neighbor's house for a ride. She was found about three hours after the accident. Her husband was injured and taken to the hospital.

Scientists Grow Hair On Aluminum

Helpful Hints

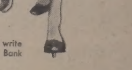

It might have been slightly easier to paint the walls of a room. The home-owner can economically paint a room successfully with a few simple pointers.

How to put wheels on a Wish

"It's Simple When You Know How."
And by a coincidence, that's the title of the Commerce booklet telling women the ways and hows of day to day banking. Get your copy at your branch of The Commerce today.

When you know and understand how to bank efficiently, then the thought of Savings becomes second nature to you. You can put wheels on your wish, whether it's a vacation trip next year, or a bicycle, or even a car... if you get into the important habit of saving. You'll discover that just a little each week builds up surprisingly.

An illustration in a vintage style. A woman in a dark coat and hat stands in the center, looking towards the right. To her right, a man in a light-colored uniform with a peaked cap stands at attention. In the foreground, a small child in a striped shirt and dark pants is reaching out towards the woman. Behind them is a large, light-colored sign with the word 'ANADIA' in bold, dark letters. The background is a simple, light-colored wall.

It's simple when you have hair.

A WOMAN AND HER HAIRING
